Sai Srikar Ravipati
Sr. Application Developer
(469) 706-9792 | sravipati01@gmail.com | https://www.linkedin.com/in/sai-ravipati-python/

Summary of Expertise:

- Having 10+ years of IT experience in various applications design, development, implementation and maintenance of Web based n-tier architecture systems using **Python, Java, NodeJS** and **C++**
- Experience working on multiple frameworks like springboot, fastapi, Angular.js, React.js, Node.js
- Extensive experience in **Design**, **Code**, **Debug**, **Test, Deployment** of web applications
- Experience in writing **REST APIs** in Python for large-scale applications.
- Dealing with challenging High Traffic Websites and Cross Browser Issues handling
- Experienced with Linux system administration, DevOps and AWS cloud platform.
- Expertise in working with different databases like **MySQL**, **Oracle**, **Aurora DB** and **Dynamo DB**
- Good working experience in using version control systems **CVS, SVN, Amazon EC2, Git, and GitHub.**
- Proficient in using Confidential Web Services AWS. Extensive experience focusing on services like **EC2, VPC, Cloud Watch, CloudFront, Cloud Formation, IAM, S3, Confidential RDS, Elastic Cache, SNS, SQS.**
- Setting up the CI/CD pipeline using GitHub, **Jenkins**, Maven, Chef, Terraform and AWS
- Superior Troubleshooting and Technical support abilities with **Migrations**, **Networking** and **Security**
- Worked on Docker's on Linux and configured Jenkins to run under **Docker** Host
- Excellent communication, analytical, Interpersonal, presentation skills and capable to meet tight deadlines

EDUCATION:

Masters in Computer Science
University of Texas at Dallas, Texas, US (2018 - 2020)

Bachelors in Software Engineering
SRM Institute of Science and Technology, Chennai, India (2011 – 2015)

Technical Expertise:

• **Programming Languages** – Python, Java, JavaScript, C++
• **Cloud Services – AWS** – EC2, ECS, S3, ELB, IAM, VPC, SNS, SQS, Route 53, Lambda, Cloud Watch, Cloud Formation, Cloud Front, Auto Scaling, Elastic Cache, EMR, Red Shift
• **Virtualization Platform** – Virtual Box, Docker, EC2 Container Services
• **Deployment & Version Control** – Docker, Ansible, Chef, SVN, GIT, Github
• **Databases** – MYSQL, Oracle, MongoDB, AWS RDS, Dynamo DB
• **Web Technologies –** Html, CSS, JQuery, HTTP protocols, REST, SOAP, AJAX and JSON
• **Frameworks** – Django, Flask, Bootstrap, Angular JS (version – 5,7,9), Spring boot and Node JS
• **Software Testing** – Selenium, Playwright, Jmeter and RPA tools
• **Monitoring** – Kibana, Graphana, Observe and Splunk
• **Operating Systems** – Windows, MacOS and Linux
• **Development Tools** – VS Code, Pycharm, NetBeans, Jupyter
• **SDLC** – Agile, Scrum, Waterfall and KANBAN

Certifications - AWS Certified Cloud Practitioner, ISTQB Certified Agile Tester and Claude AI developer

Summary of Expertise:

Capital One, Plano, TX – USA
Sr. Software Engineer
Sep 2024 – Till Date

Responsibilities:

- Designed, Developed and deployed scalable microservices using AWS Fargate, EC2, ECS with CI/CD automation
- Implemented multiple AWS lambda's and RDS databases to assist in team operations.
- Acted as primary on-call engineer (24x7) for production support, triaging critical incidents under pressure.
- Built and optimized CloudFormation/Terraform scripts to automate infrastructure provisioning.
- Integrated CloudWatch, X-Ray, and AWS Config for full-stack observability and traceability.
- Designed and maintained unit tests with 90%+ coverage using unittest, mockito and pytest.
- Spearheaded performance benchmarking using JMeter and custom Python scripts to simulate real-world
- Created multiple bash / python based scripts to handle ad-hoc activities and multiple dashboards
- Responsible for creating new alerts for new services and integrating them to pager-duty services of team
- Implemented multiple vulnerability package updates across java, python and nodejs applications
- Managed high-throughput data ingestion from SQS queues with async processing and fault tolerance.
- Developed Python-based health check and self-healing scripts for ECS service stability.
- Resolved major P1 outages in record time, improving SLA adherence and incident response.
- Conducted postmortems, identified root causes, and implemented automated alerting for proactive recovery.
- Created internal documentation and playbooks to streamline support and onboarding and assisted new team members by providing KT

Environment: Python 3.9-3.12, Linux, Docker, MySQL, Git, Splunk, GitHub, Jmeter, Bash Scripting, AWS - ECS, EC2, S3, IAM, Lambda Docker, Cloud Watch, Cloud Formation, Alerts

Great American Insurance Group, Plano, TX – USA
Sr. Application Developer
Jan 2023 – Aug 2024

Responsibilities:

- Developed security policies and processes. Developed views and templates with Python and Django's view controller and templating language to create a user-friendly Website interface.
- Involved in the complete Software Development Life Cycle including gathering Requirements, Analysis, Design, Implementation, Testing and Maintenance.
- Experienced with AWS cloud platform and its features such as EC2, S3, ROUTE53 VPC, EBS, AMI, SNS and RDS
- Introduced new features and solved existing bugs by developing code for a cloud-based integration platform (iPaaS) and Migrated customer data from legacy iPaaS to AWS.
- Extensive experience automating the build and deployment of scalable projects through Gitlab CI/ CD, Jenkins
- Used JavaScript's for data validations and designed validations modules.
- Designed and developed new reports and maintained existing reports using Microsoft SQL Reporting Services
- Developed framework for converting existing PowerCenter mappings and to PySpark(Python and Spark) Jobs.
- Created AWS Security Groups for deploying and configuring AWS EC2 instances.
- Used Celery with RabbitMQ, MySQL, Django, and Flask to create a distributed worker framework.
- Extensively worked on Data Extraction from REST API's, Data Munging
- Created Airflow Scheduling scripts in Python
- Designed GraphQL to build client applications by providing an intuitive and flexible system for interactions.

Environment: Python 2.7, Django 1.4, HTML5, CSS, XML, MySQL, JavaScript, Angular JS, jQuery, CSS Bootstrap, JavaScript, Eclipse, Git, GitHub, AWS, Linux, Shell Scripting, AWS - EC2, S3, IAM, Lambda Docker, Cloud Watch

Capital One, Plano, TX – USA
Sr. Software Engineer
Aug 2021 – Jan 2023

Responsibilities:

- Worked mainly on design, development and deployment of **AWS lambda's** for Data processing jobs for multiple internal teams written in python.
- Wrote scripts in **Python** for extracting data from **SQL** and HTML file.
- Developed views and templates with Python and **Django's** view controller and templating language to create a user-friendly website interface.
- Performed **troubleshooting**, fixed and deployed many bug fixes for applications that were a main source of data for both customers and internal customer service team.
- Wrote **Python** scripts to parse **JSON** files and load the data in database.
- Worked on **Restful API's** to access the third-party data for the internal analysis and representation of data.
- Used Python and Django to interface with the **JQUERY UI** and manage the storage and deletion of content.
- Developed application using NodeJS for Asynchronous Module Definition (AMD) and Grunt as task manager.
- Worked on developing CRUD applications using MERN stack (MongoDB, Express, ReactJS and NodeJS)
- Microservice API development using NodeJS, Docker, and Kubernetes.
- Created database using **MYSQL**, wrote several queries to extract data from database.
- Setup automated **CRON JOBS** to upload data into database, generate graphs, bar charts, upload these charts to wiki and backup the database.
- Developed and tested many features for dashboard using **Flask**, **CSS** and **JavaScript**.
- Followed **AGILE** development methodology to develop the application.
- Implemented the user login authentication using **AngularJS 9**

Environment: Python 2.7, Node JS, Django 1.4, HTML5, CSS, XML, MySQL, JavaScript, Angular JS, jQuery, CSS Bootstrap, JavaScript, Eclipse, Git, GitHub, AWS, Linux, Shell Scripting, AWS - EC2, S3, IAM, Lambda Docker

USAA Insurance, Dallas, TX – USA
Sr. Software Developer
Jul 2020 – Jul 2021

Responsibilities:

- Worked on full-stack development, with a focus on react/redux on the front-end and nodejs on the back-end.
- Created single-page applications using React and ES6, including a flashcard application and an Evernote clone.
- Developed dynamic responsive Web Application by integrating Angular JS with Bootstrap and LESS CSS which is further integrated with Web Services.
- Created a crypto currency wallet and a blockchain based reward engagement platform built with React/Redux/Sagas, Node JS,
- Developed single page applications using React Redux architecture, ES6, web pack and grunt.
- Used React JS to build encapsulated components that manage their own state, then compose them to make complex UIs. Used ES6 and JSX with react for component development.
- Worked on Angular with TypeScript and other latest client-side technologies including ReactJS, ES6, Gulp, NodeJS, RxJS, Angular CLI, Webpack, Karma and Jasmine.
- Used ES6, JSX with react for component development make react look more elegant
- Used Babel.js to transpile ES6 and JSX into JavaScript
- Very Strong in developing applications using Angular JS, HTML5, Bootstrap, Java Script, CSS3.
- Used Sencha Touch and EXT JS for the Mobile web interface development. Also used JSON and JQuery for Mobile application development .Worked with HTML 5 and CSS 3.
- Used Node.JS, React.JS, and Backbone.JS MVC framework for developing the Single Page Application (SPA). Backend development done using Node.js, Cassandra, and Redis.

- Implemented the Restful API using Sequelize.js with Node.js
- Huge experience working on different Technologies used include VueJS, HTML, SCSS, Cypress, Git, Tornado, Apollo-GraphQL, SQLAlchemy.

Environment:, Express js, Promises, Microservices, ES6, Typescript, JavaScript, Angular.js, bootstrap.js, React.js, Node.js, Oracle, PL/SQL, JDBC, Cassandra, REST, Protractor, Jasmine, Agile, MAVEN, Eclipse, Weblogic, Git, GitHub.

Globe Life Insurance, **McKinney, TX**
IT Applications Intern
May 2019 – May 2020

Responsibilities:
- Analyzed the requirements and provided inputs to the designer.
- Designed Class diagrams, framework and developed using Factory, DAO, Singleton and MVC pattern.
- Developed the business tier using Core Java and the **HTTP** interfaces using Servlets.
- Involved in review of the design and helped in transforming the application to an optimized solution
- Designed the helper classes for better data exchange between the MVC layers. JSP, HTML, Javascript, CSS and Ajax used for front end development.
- Worked with multithreading in synchronized environment.
- Designed dynamic and multi-browser compatible pages using **HTML**, **CSS**, **JQuery**, **Angularjs 7** and JavaScript.
- Used **AngularJS 7** for developing single page web applications taking advantage of its two-way data binding to improve performance.
- Worked in modern, mobile ready responsive front end development with CSS3 media queries, AJAX, **Bootstrap**, **Angular JS 7**, and **jQuery**.
- Involved in development of GUI Using HTML, CSS, JSP and JavaScript.
- Responsible for developing GUI / user interfaces using **JSP, CSS & DHTML**
- Designed and developed the persistence tier using **Hibernate** framework.
- Used **Websphere** data sources for the database connection and accessed using JNDI names.
- Implemented the Web sphere scheduler and provided the scheduling logic to process the Cache.
- Developed a Stored Procedures for regular cleaning of database.
- Used Oracle as relational databases and created E-R diagrams for the database tables.
- Managed the functional and load testing by interacting with the testers and providing them the guidelines and deadlines for completion of work.

Environment: HTML, CSS Jquery, Ajax, Sencha EXTJS, JSP, JSTL, Javascript, Servlet, JAVA, Hibernate, Struts, Weblogic, Apache CXF, Rest, AJAX, jQuery, JSP, Eclipse, Junit, Maven, ITEXT, GWT, Oracle, CRUD, PL/SQL, JDBC, UML,

Standard and Poor's Global, Hyderabad, India
Software Engineer
July 2015 – July 2018

Responsibilities:
- Created many API's for Iscrum project which involves creating and maintaining projects in an organization. and developed UI using **HTML, CSS** and **JavaScript**.
- Worked on Node.js Middleware framework like Express.jsand Yoemon, essentially developed microservices and serve them through middleware.
- Used Saga Middleware, Redux-Promise in application to retrieve data from Back-End.
- Worked on Redux for state manipulations and Redux Saga to implement API requests asynchronously.
- Developed modules using Node JS and Promises.

- Implemented Angular best practices such as dependency injection, single-purpose modules, promises, and thin controllers to produce clean, efficient code.
- Good Experience in developing a Single Page Applications using **AngularJS 5**.
- Proficient in **Angular 5 - Routing, UI Router, Controllers, Filters** and **Services**
- Used **Angular 5** Reactive forms to implement complex forms and performed the validations using Form Builder
- Used JSF messages for handling the error messages for the applications ● Integrate the Oracle BPM with the Spring Framework in the enterprise layer.
- Implemented the **MVC** architecture using **Apache Struts** Framework.
- Used Ant for developing build scripts and deploying the application onto WebLogic.
- Configured glassfish server; Design shipping rate template upload UI using Jasper report.
- Designed various design Workflow Modules using **BPM** (Business Process Modeler) to implement Business Logic and Business rules using Ilog, Jrules.
- Developed framework using **Java**, BIRT Runtime, iText, **MySQL** and web server technologies.
- Worked with Rational ClearCase to provide sophisticated version control, workspace management and parallel development support. Build and maintained a Selenium Regression test suite.
- Involved in writing Spring Configuration **XML**, file that contains declarations and business classes are wired-up to the frontend managed beans using Spring IOC pattern.
- Performed **J2EE** application deployment using JBoss application server on Windows and Linux.
- Expose PL/I database access layer as web service using RD/Z
- Responsible for the design, development, unit testing, deployment and maintenance of **COBOL** and PL/I programs for two major projects:
- Coded scripts to clean normalize, reformat data for loading into the system using **Ruby** scripts

Environment: J2EE, EJB 3.0, Struts, spring, JSF, IBM MQ Series, Servlets, XML, XSL, XSD, CSS, PVCS, Java Script, AJAX, MVC, HTML, Angular.js, Multithreading, Eclipse, JUnit, JSF, JTS, Hibernate, agile, Oracle11g and Windows

HCL Infotech, Chennai, India
Software Developer Intern
May 2014 – June 2015

Responsibilities:

- Created different parsing interfaces to parse **XML** using **DOM** and persist in **MySQL** database
- Responsible for writing Spring Application for data base manipulation in context of core, MVC, AOP and annotation modules
- Developed a **Spring MVC** application in connecting to database ● Adapted RESTful for performing web services
- Used Node.js middleware Melter for uploading files.
- Written **SQL, PL/SQL** and stored procedures as part of database interaction
- Created **UNIX shell scripts** to automate the build process, to perform regular jobs like file transfers between different hosts
- Validated query execution plans & tuned queries using Indexes, Views and Batch processing
- Implementing presentation layer using **JSF**, **JSP**, **HTML**, **CSS**, and **jQuery**, **JavaScript**, **Angular** Js 5, Ext's, JSON and Servlets
- Created check printing template using HTML in APEX and created web pages using mean stack
- Set up **JBoss** Server, Configured **MySQL** Cluster in Linux OS and installed Open Call XDMS
- Designed **Frontend** with in object-oriented JavaScript Framework like React JS
- Involved in standard design patterns of software engineering and created design patterns to cover system needs

Environment: Java/J2EE, JSP, Servlets, Struts, JDBC, JavaScript, HTML, Apache Tomcat Server, Oracle 8 SQL, JavaBeans, CSS, HTML, Mozilla Fire Bug, Eclipse, Hibernate, JUnit, SVN, JIRA.
